### ***Reasons for Allowance***

The following is an examiner's statement of reasons for allowance: the claims of the present invention are directed to a device for performing intravascular procedures. The device includes a valve means positioned at the portion thereof for placement in the flowpath of the blood vessel, and a filter configured on the upstream side of the device and the valve means configured on the downstream side of the device so as to position the filter upstream of the valve means and prevent prolapse of the valve means with the filter during blood flow in an upstream direction. The prior art does not disclose a device for performing intravascular procedures comprising a filter configured on the

upstream side of the device and a valve means configured on the downstream side of the device.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
